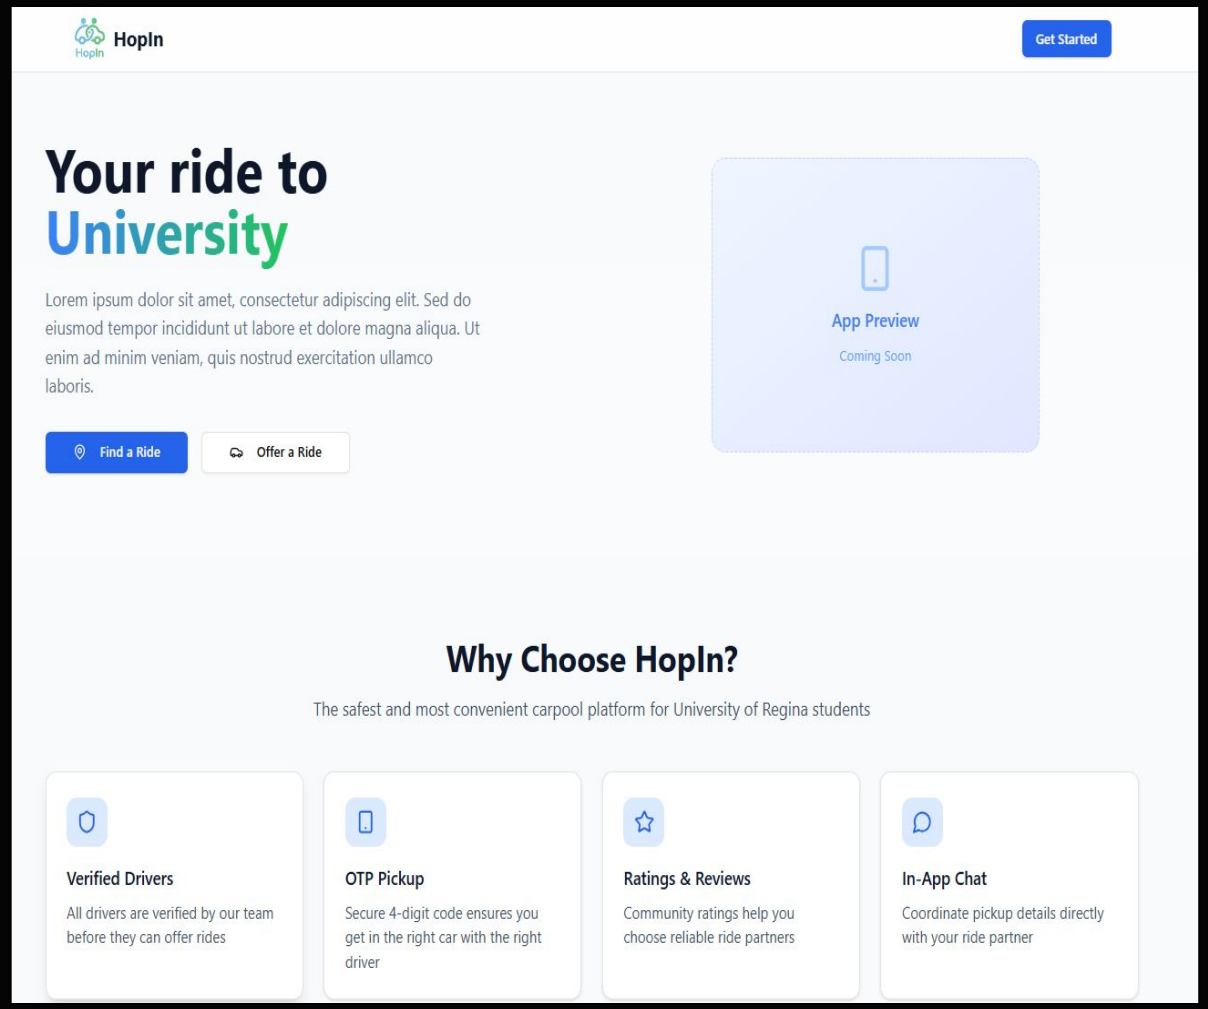
HopIn: Urban Mobility

Project Information & Hi-Fi Prototype Workflow

About the Project

HopIn is a platform designed to make daily commuting efficient and community-driven. By securely connecting drivers with empty seats to passengers on the exact same route, it provides a smart urban mobility solution.

- Significantly reduces daily commuting expenses.
- Lowers the carbon footprint in crowded urban areas.
- Builds a trusted community through verified driver and passenger profiles.



Project Planning Methods

Meeting 4

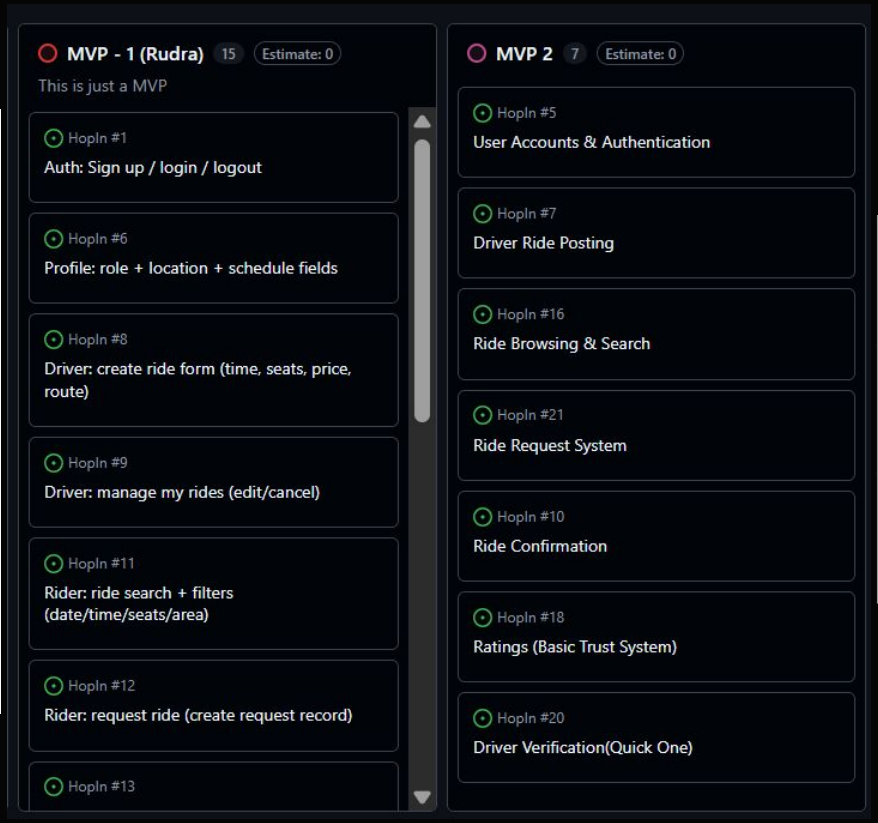
- Time: Feb 5, 2026 1:00 pm to 3:00pm
- Agenda: Distributing Task 2 document requirements, prototype brainstorming, other suggestions

Team Member	Current Task	Completion State	Next Task
Jessica	Create survey	Done	Creating mock-ups/prototypes
Suhayb	Create survey	Done	Creating mock-ups/prototypes
Rudra	Disscuising app features	Done	Creating mock-ups/prototypes
Youssef	Disscuising app features	Done	Creating mock-ups/prototypes
Rida	Disscuising app features	Done	Creating mock-ups/prototypes

Meeting 5

- Time: Feb 17, 2026, 6:45 pm to 7:50pm
- Agenda: Discuss MVPs and filling up Kanban

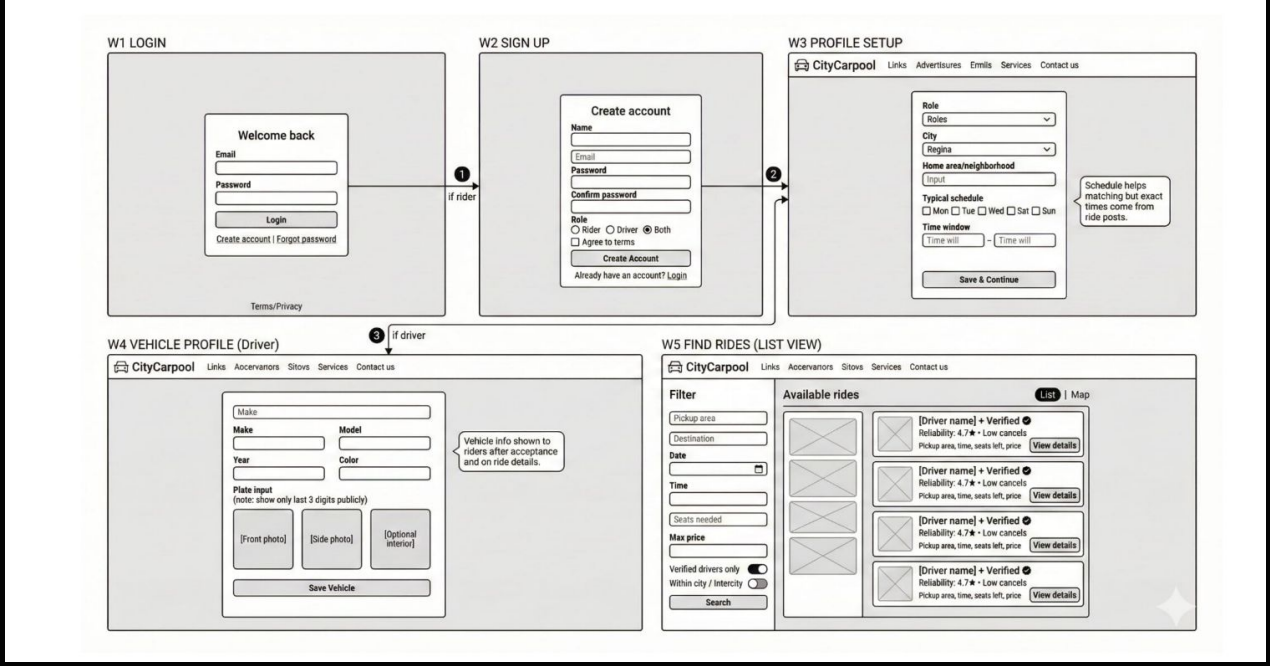
Team Member	Current Task	Completion State	Next Task
Jessica	Creating mock-ups/prototypes	Done	Finish project requirements document
Suhayb	Creating mock-ups/prototypes	Done	Finish Stakeholder register document
Rudra	Creating mock-ups/prototypes	Done	Finish Project roles & responsibilities document
Youssef	Creating mock-ups/prototypes	Done	Github Kanban project board
Rida	Creating mock-ups/prototypes	Done	Finish project scope document



March 4 - 21	Page creation in HTML, css, and DB creation
March 21 - March 28	Event handling and unit testing
March 28 - April 3	Iteration and unit testing

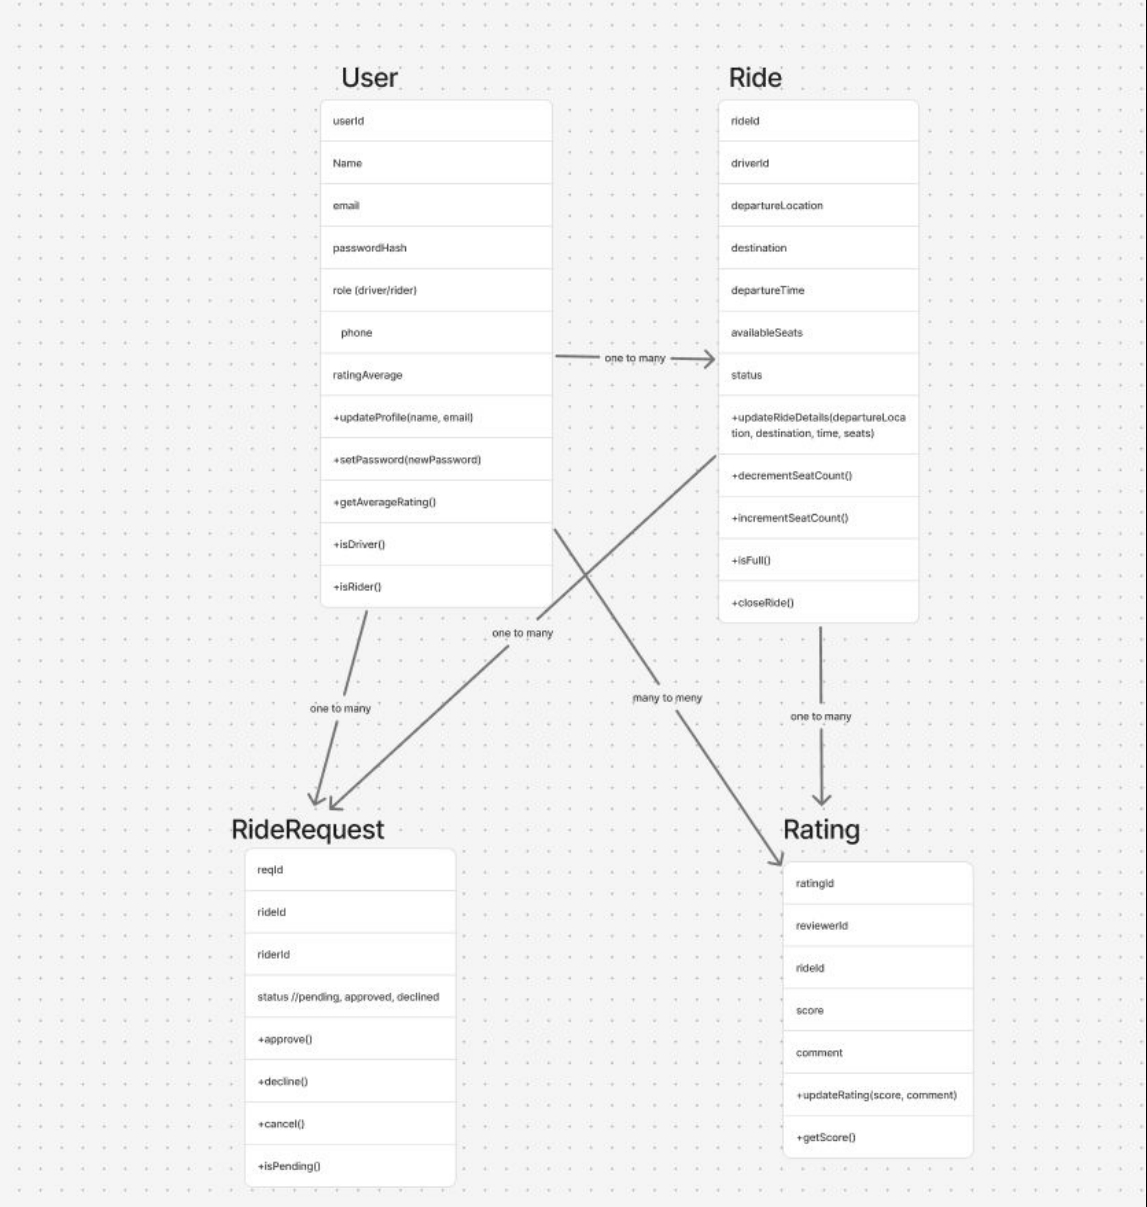
1. Meeting Minutes → 2. Kanban → 3. Project Planning Doc

System Design



1. Lo-Fi prototype

→



2. Class Diagram
(more diagrams to come soon!)
