HopIn (carpooling app) Survey

* Indicates required question

When you first landed on the login screens, how clear was it to get started as a driver vs. a rider? *

- ◯ Very confusing, I didn't know where to click.
- ◯ Somewhat confusing.
- ◯ Neutral / It was okay.
- ◯ Mostly clear.
- ◯ Very clear and intuitive.

Which words best describe your initial reaction to the app's design and layout? *

- [ ] Modern and clean
- [ ] Professional and trustworthy
- [ ] Cluttered or overwhelming
- [ ] Outdated
- [ ] Confusing to navigate

Was there anything on the initial landing page that felt unnecessary or distracting? *

- [ ] Too much text to read
- [ ] Unclear buttons or calls to action
- [ ] The navigation menu was confusing
- [ ] Nothing—it looks great as is
- [ ] Other: _____

How intuitive was the process of searching for a ride to get to a morning lecture? *

- ◯ Very difficult to find what I needed
- ◯ Took a few tries to figure it out
- ◯ Standard / Expected experience
- ◯ Easy and straightforward
- ◯ Extremely intuitive
- ◯ N/A - I only looked at the driver side

If you were driving to campus, did the prototype make it simple to post your available seats? *

- ◯ Yes, it was very fast and easy.
- ◯ It was okay, but there were too many steps.
- ◯ No, I found the process confusing.
- ◯ N/A - I only looked at the rider side.

When testing the booking flow, did you feel like you had enough control over the pickup and drop-off locations? *

- ◯ Yes, the location selection was perfect.
- ◯ Mostly, but I wanted more specific map pins/zones.
- ◯ No, it felt too restrictive or hard to set my location.

What specific details on a user's profile would make you feel secure about sharing a ride with them? *

- [ ] Verified university email address
- [ ] Clear profile picture
- [ ] User ratings and written reviews from other students
- [ ] Car make, model, and license plate info
- [ ] Seeing mutual classes or mutual friends
- [ ] Number of past successful rides completed

Which safety or communication features do you consider an absolute "must-have" before using this app? *

- [ ] In-app messaging (so I don't have to give out my phone number)
- [ ] SOS / Emergency contact button
- [ ] Live GPS tracking to share my route with a friend
- [ ] Driver verification badge (e.g., student ID checked)
- [ ] Other: _____

Be completely honest: what would be the biggest barrier preventing you from actually using this app to get to the U of R campus? *

- [ ] Not enough active drivers/riders on the app
- [ ] Safety or stranger-danger concerns
- [ ] Awkwardness of riding with someone I don't know
- [ ] Unreliable schedules (worried about being late for class)
- [ ] I prefer my current method (bus, driving alone, walking)
- [ ] Other: _____

Compared to your current method of commuting, how convenient does this app feel? *

- ( ) Much more convenient
- ( ) Slightly more convenient
- ( ) About the same
- ( ) Less convenient
- ( ) Much less convenient

Any other suggestions?

Add being able to see mutual classes or mutual friends, I think it'll make the app more popular

A safety feature that has a time stamp that messages user if they made it there safe, if no reply, it could trigger SOS.. as an option for a user.. not manditory
